PERSONAL SUMMARY

Dynamic Software Engineer with a proven track record at G2, specializing in full-stack development and innovative solutions. Expert in Rails and Hotwire, I enhance user experiences while maintaining high code quality. Known for strong collaboration and adaptability, I successfully led teams to achieve significant efficiency improvements in software delivery.

SKILLS

- PostgreSQL
- Javascript
- Sidekiq
- React
- RSpec
- Stimulus
- Docker
- Node
- Python
- OpenAI Codex
- ChatGPT
- Agentic AI
- Adaptability
- Strong work ethic
- Patience

Vince Carollo

EMPLOYMENT

January 2023 - Current

Software Engineer III G2 | Chicago, IL

- Develop and integrated full-stack features within Rails 7 Monolith on AWS for robust performance.
- Leverage Hotwire to create responsive user interactions using behavior-driven development techniques.
- Lead engineering teams in solving complex technical challenges, promoting collaboration for innovative solutions.
- Create comprehensive unit tests to maintain high code quality standards and reinforce best practices.
- Analyze user requirements to formulate software solutions and produce technical specifications.
- Utilize OpenAI Codex to prototype, refine, and deploy production-ready code, accelerating development and enhancing solution quality.

August 2021 - January 2023

Application Developer II ValueHealth | Leawood, KS

- Helped migrate from Rails 5/React to a Rails 6+ Monolith
- Create full stack features with a focus on intuitive user interactions
- Create responsive client interactions using HTML over the wire (Hotwire)
- Started and maintain RSpec/Capybara/Factory Bot test suite
- Rewrote 3rd party integration, implementing efficiency changes that cut requests made and time spent by half

October 2019 - August 2021

Software Engineer Travelers Haven | Denver, CO

- Promoted from Associate within six months of tenure.
- Developed highly responsive user interface components using React and Angular.
- Maintained and enhanced corresponding endpoints in Ruby on Rails application.
- Collaborated with Product Management and User Experience teams on product definition and project decisions.
- Troubleshoot interface software and resolved issues with Netsuite integration.

EDUCATION

September 2019

Backend Engineering Program

Turing School of Software And Design, Denver, CO
