PERSONAL SUMMARY

Full-stack Software Engineer with a track record of improving application performance and developer efficiency. Skilled in modern web frameworks and technologies, delivering responsive features and robust test coverage. Recognized for leading engineering teams and streamlining development workflows to accelerate project delivery.

SKILLS

- PostgreSQL
- JavaScript
- Sidekiq
- React
- RSpec
- Stimulus
- Docker
- Node
- Python
- Claude Code
- ChatGPT
- Adaptability
- Strong work ethic
- Patience

Vince Carollo

EMPLOYMENT

January 2023 - Current

Software Engineer III G2 | Chicago, IL

- Develop and deploy full-stack features in a Rails 7 monolith on AWS.
- Leverage Hotwire to create responsive user interactions using behavior-driven development techniques.
- Lead engineering teams to solve complex technical challenges, promoting collaboration and innovative solutions.
- Create comprehensive unit tests to maintain high code quality standards and enforce best practices.
- Analyze user requirements to design software solutions and produce technical specifications.
- Leverage Claude Code to prototype and implement features, accelerating development cycles, and enabling faster iteration on complex functionality.

August 2021 - January 2023

Application Developer II ValueHealth | Leawood, KS

- Migrated a legacy Rails 5/React application to a Rails 6+ monolith, reducing maintenance overhead and improving feature integration.
- Developed intuitive, responsive client interactions using Hotwire.
- Designed and maintained RSpec, Capybara and FactoryBot test suite, increasing code coverage by 80% and reducing production bugs.
- Rewrote third-party integration, cutting API requests by 50% and improving system efficiency.

October 2019 - August 2021

Software Engineer Travelers Haven | Denver, CO

- Promoted from Associate within six months due to demonstrated impact and leadership.
- Developed highly responsive user interface components using React and Angular.
- Maintained and enhanced corresponding endpoints in the Ruby on Rails application
- Collaborated closely with Product Management and UX teams to define product features and prioritize development tasks.
- Troubleshoot interface software and resolved issues with NetSuite integration, reducing downtime by 20%.

EDUCATION

September 2019

Backend Engineering Program

Turing School of Software & Design, Denver, CO
