SUMMARY

Full-stack engineer with 6+ years shipping production systems and a track record of owning features end-to-end, from product scoping through deployment. Early adopter of AI-assisted development workflows, building agent tooling and prompt-driven automation that accelerates prototyping and delivery. Proven impact on conversion metrics, payment systems, and platform reliability. Known for leading engineering teams and championing test-driven, behavior-driven practices.

TECHNICAL SKILLS

AI & Automation	Claude Code, OpenCode, Anthropic API, N8N, AI agent orchestration, prompt engineering
Languages & Frameworks	Ruby on Rails, JavaScript, React, Hotwire, Python, Node.js
Data & Infrastructure	PostgreSQL, Sidekiq, Docker, AWS (EC2, S3)
Testing	RSpec, Capybara, FactoryBot, Cypress, Playwright, TDD
Integrations	Google, LinkedIn, Pendo, NetSuite, Iterable, Hubspot

EXPERIENCE

Software Engineer III

G2 · Chicago, IL (Remote) · January 2023 – Present

- ▶ Architected and launched an AI-driven feedback engine using Anthropic models that synthesizes 16 seller and competitor signals into actionable next-step recommendations for sales teams.
- ▶ Migrated review campaigns to a credit-based payment system supporting significant monthly transaction volume.
- ▶ Designed a behavioral nudge system that increased review notification email signups by 31%.
- ▶ Diagnosed and eliminated a critical Pendo integration failure in a serverless AWS Lambda function, reducing failure rate to <1% and restoring in-app functionality.
- ▶ Developed a library of AI agents, prompt chains, and reusable automation workflows using Claude Code and OpenCode, accelerating feature prototyping and code generation.
- ▶ Led engineering teams through complex full-stack challenges in a Rails 7 / AWS monolith, using Hotwire for responsive interactions and BDD with comprehensive RSpec test suites.

Application Developer II

ValueHealth · Leawood, KS · August 2021 – January 2023

- ▶ Migrated a legacy Rails 5 / React application to a Rails 6+ monolith, consolidating two codebases and cutting deploy complexity.
- ▶ Designed and maintained an RSpec, Capybara, and FactoryBot test suite, increasing code coverage from 10% to 99% and reducing production bugs.
- ▶ Rewrote a third-party integration, reducing API requests by 50%, lowering costs and improving efficiency.
- ▶ Developed intuitive, responsive client interactions using Hotwire.

Software Engineer

Travelers Haven · Denver, CO · October 2019 – August 2021

- ▶ Promoted from Associate within six months due to demonstrated impact and leadership.
- ▶ Developed responsive UI components using React and Angular.
- ▶ Collaborated closely with Product Management and UX teams to define product features and prioritize development tasks.
- ▶ Resolved NetSuite integration issues, reducing downtime by 20%.

EDUCATION

Backend Engineering Program

Turing School of Software & Design, Denver, CO · Graduated 2019
